

Table of Contents

Acknowledgments	ix
About the Author and Contributors	xi
Introduction	xv
Part One: Risk Assessment and Security Planning	1
Chapter One: People and Property	3
People	3
Property	6
Communications Security	8
Conflicts Between Security and Safety	9
Conclusion	11
Chapter Two: Identifying Security Threats	13
What Can Happen	13
Threats to Personnel Safety	15
Theft of Property	20
Vandalism and Sabotage	21
Conclusion	22
Chapter Three: Assessing the Risks	23
Assigning the Assessment and Response Team	23
Periodic Review of Documentation	25
Assembling a Risk Assessment Group	25
Deciding Where to Focus Security Measures	26
Assessing the Facility	27
Assessment of Specific Risks	29
Probability of Occurrence	31
Assessing Facilities by Type	33
Conclusion	38

Chapter Four: Crisis Management	41
Making Crisis Management Plans	41
Who Prepares the Plan?	42
What Are the Critical Objectives?	47
Teams and Teaming	64
Chapter Five: Security through Planning, Design, and Operations	79
The Urban Setting	80
Three Approaches to Physical Protection	80
Public Space Versus Private Space	84
Creating and Updating a Security-Conscious Building Plan	85
Single-User Versus Multi-User Facilities	86
A Word of Caution	86
Storage of Volatile Materials	86
Protecting Utilities	87
Ingress Concerns	88
Establishing a New Physical Security Plan	89
Budgeting and Startup	91
The Security Station	91
Points of Egress and Refuge	92
Fire Suppression and Alarm	94
Interior Planning and Design	95
Other Interior Spaces	107
Conclusion	108
Chapter Six: Chemical, Biological, and Radiological Agents	109
Biological Agents	110
Chemical Agents	114
Radiation	116
Conclusion	119
Chapter Seven: Responses to Emergency Events	121
Emergency Response Teams and Plans	121
Evacuation	122
Alert Systems	124
Shelter from Severe Weather	126
Weather Forecasting Sources	127
Emergency Equipment	127
Health, Safety, and Security	128
Fresh Air and Lighting	128
Conclusion	130

Chapter Eight: Security Devices and Systems	131
Controlling Access	131
Review of Security Devices and Systems	136
Emergency Communications	173
A Word About Privacy and Security	174
Conclusion	175
Chapter Nine: Integration of Security and Related Systems	177
Information Technology Security	177
Monitoring	179
Proprietary or On-Site Systems	180
Off-Site Monitored Systems	181
Components of Security Monitoring Stations	181
Integration and Enterprise Security and Safety	182
What Components Should Be Integrated?	183
Integrated Components	184
Deciding Which Systems to Integrate, and When	193
Conclusion	193
Part Two: Security Cost Data	197
Introduction to the Cost Data	199
Quick Start	201
How to Use the Cost Data: The Details	202
How to Use the Unit Price Pages	204
Unit Price Section	206
How to Use the Assemblies Cost Tables	263
Assemblies Section	265
Crews	322
Location Factors	324
Part Three: Appendix, Resources, Glossary, and Index	331
Introduction	333
Appendix	335
Resources	347
Glossary	367
Index	377
